

International Open Access Week

Mark Costa
RESEARCH PROFESSIONAL

Location: Brazil

Challenge: subjected to the publish or perish model, where he's always faced with pressure to publish his work for career advancement

Takeaway: Open Access can eliminate structural barriers like APCs and journal hierarchies, allowing for early dissemination of work

Dr. Angela Patel
HEALTH PROFESSIONAL

Location: UK

Challenge: Timely access to the latest studies to inform patient care, advance health equity, and patient empowerment

Takeaway: Open Access improves clinical decision-making, which can help bolster patient trust

Emily Johnson
MEMBER OF THE GENERAL PUBLIC

Location: North America

Challenge: Curious about scientific academic research but often excluded due to paywalls

Takeaway: Fosters public understanding and engagement in science

Open Access practices match the dynamic nature of the scientific process, allowing broad participation and therefore unlocking innumerable opportunities for innovation
